

Dedication

IAN LAMBIE joined the club as a young man shortly after it was revived in 1954. On the resignation of the secretary in 1960 he accepted the onerous duties of the post and faithfully discharged them for 20 years. On his resignation in 1980 he was elected President. During those 20 years the membership of the club trebled and the work with it. Much of the prestige and popularity of the club today can be attributed to his wise conduct of its affairs and though he obviously believes that the "soft answer turneth away wrath" this does not prevent him from fighting tenaciously for the things he believes to be right, e.g. the removal of the barge *Pelican* from the Caroni Swamp Nature Reserve.

In recognition of his tremendous contribution to the life of the club this issue of its journal is dedicated to him.

IAN LAMBIE President of the Club
