Problems to be Solved in Trinidad and Tobago's Ornithology

Richard ffrench

ffrench, R. 2003. Problems to be Solved in Trinidad and Tobago's Ornithology. *Living World, Journal of The Trinidad and Tobago Field Naturalists' Club*, 2003, 08-08.

NATURE NOTE

Problems to be Solved in Trinidad and Tobago's Ornithology.

- a. Are there still any quail-doves living on Tobago?
- b. Find a nest of either Gray-rumped or Band-rumped Swift on Trinidad.
- c. What is the status of the Purple Honeycreeper on Tobago?
- d. Keep a look-out (and listen!) for Scarlet-shouldered Parrotlet on Trinidad.
- e. Find out **anything** about Striped Owl on Tobago.
- f. Check for nesting records on Trinidad of Neotropic Cormorant.
- g. Find nests of **any** crane, especially Yellow-breasted or Ash-throated.
- h. Find conclusive evidence of **nesting** Rufous Nightjar or Yellow Warbler on Tobago.
- i. Separate (and record) the calls/songs of the four or five *Myiarchus* flycatchers that occur on Trinidad and Tobago (and Bocas islands).
- j. Survey the bird populations of the summits of El Tucuche and Cerro del Aripo.
